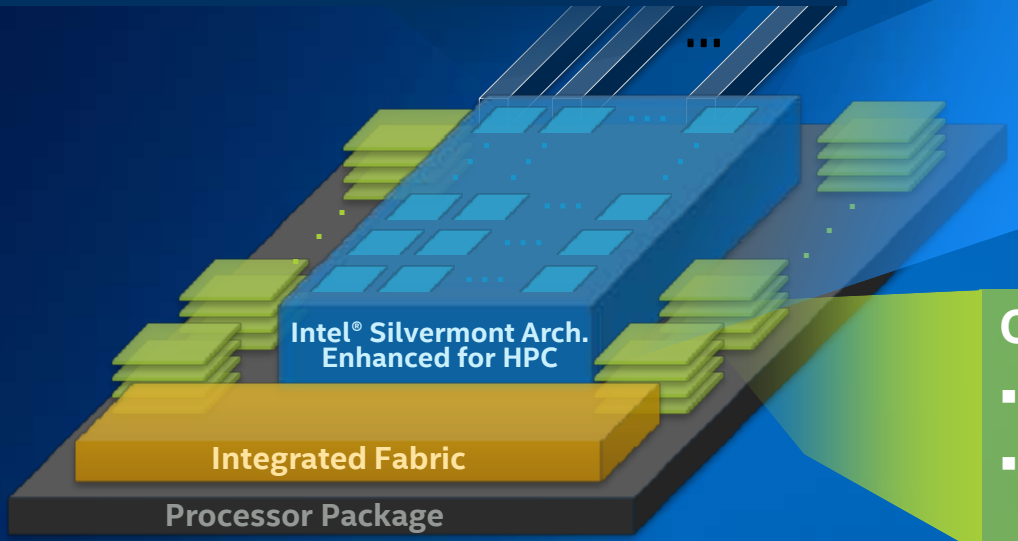
Unveiling Details of Knights Landing

(Next Generation Intel® Xeon Phi™ Products)

2nd half '15
1st commercial systems

3+ TFLOPS[1]
In One Package
Parallel Performance & Density

Platform Memory: DDR4 Bandwidth and Capacity Comparable to Intel® Xeon® Processors



Compute: Energy-efficient IA cores[2]

- *Microarchitecture enhanced for HPC[3]*
- ***3X** Single Thread Performance vs Knights Corner[4]*
- *Intel Xeon Processor Binary Compatible[5]*

On-Package Memory:

- *up to **16GB** at launch*
- ***1/3X** the Space[6]*
- ***5X** Bandwidth vs DDR4[7]*
- ***5X** Power Efficiency[6]*

Jointly Developed with Micron Technology

All products, computer systems, dates and figures specified are preliminary based on current expectations, and are subject to change without notice. [1]Over 3 Teraflops of peak theoretical double-precision performance is preliminary and based on current expectations of cores, clock frequency and floating point operations per cycle. FLOPS = cores x clock frequency x floating-point operations per second per cycle. . [2]Modified version of Intel® Silvermont microarchitecture currently found in Intel® Atom™ processors. [3]Modifications include AVX512 and 4 threads/core support. [4]Projected peak theoretical single-thread performance relative to 1st Generation Intel® Xeon Phi™ Coprocessor 7120P (formerly codenamed Knights Corner). [5] Binary Compatible with Intel Xeon processors using Haswell Instruction Set (except TSX) . [6]Projected results based on internal Intel analysis of Knights Landing memory vs Knights Corner (GDDR5). [7]Projected result based on internal Intel analysis of STREAM benchmark using a Knights Landing processor with 16GB of ultra high-bandwidth versus DDR4 memory only with all channels populated.

Conceptual—Not Actual Package Layout
